FIG. 51

A hand-drawn diagram showing a horizontal line with three points labeled 907, 908, and 902. A vertical line segment connects point 908 to a circle below the main line. A curved line segment connects point 908 to point 902.

A

b

C

A hand-drawn schematic diagram of a multi-layered structure. It consists of several horizontal lines. On the left, a bracket labeled '900' spans the first two layers. In the center, a bracket labeled '904' spans two layers. On the right, a bracket labeled '902' spans the entire structure. A label '906' points to a specific layer, and a label '908' points to a small circular feature on one of the layers.

D

E

A hand-drawn diagram of a cell. It features a large, irregularly shaped nucleus on the right side, labeled '908'. To the left of the nucleus is a smaller, oval-shaped structure filled with horizontal lines, labeled '901'. Above the nucleus, the number '910' is written. To the left of the cell, the number '904' is written. Several horizontal lines pass through the cell, representing the cell membrane or cytoplasm.

F

A hand-drawn diagram of a mechanical assembly. It shows two horizontal shafts. The top shaft has a component labeled 907 on its left end, a wavy line in the middle, and a large circular component labeled 908 on its right end. The bottom shaft has a component labeled 904 on its left end, a wavy line in the middle, and a large circular component labeled 906 on its right end. The two shafts are connected by a vertical link or bracket on the left side.
